<b>Notes:</b>					
1. These ratings are derived from the formula that the ISC website uses. It is available at <a href="http://www.isc.ro">www.isc.ro</a> .					
2. The ISC formula depends on only the following variables: a. Your current rating; b. Your score in the game; 3. Your opponent's current rating, and; 4. Your opponent's score in the game. If a player with a very low rating defeats a player with a very high rating both of their ratings can change by as much as 40 points. This formula will make ratings much more volatile.
